

2019 SPRING
NEW MODEL

Portable Gas Monitor

For 5 gases

For 4 gases

GX-3R Pro / GX-3R

World Smallest & Lightest

Wearable in Breathing Zone

OSHA recommends wearing the gas detector in the Breathing Zone. The GX-3R is the worlds smallest and lightest 4 gas monitor, so is perfect for this.

Robust design: 7m drop test and IP68 equivalent.

GX-3R can withstand the impact of a 7m drop, and submersion in over 1 meter of water.

Bluetooth (GX-3R Pro)

"RK-Link" app can show the live reading and set up device configuration on phone or tablet. Remote notification of gas alarm conditions.

Pioneer of Gas Detection

We are creating safe environments for workers for 80 years with our own Japanese sensing technology. Our products help to insure safety by preventing industrial disasters such as explosions and by monitoring for toxic gas leakage in workplace environments. For semiconductor & LCD factories, petrochemical plants, iron works, vessels, oil storage bases, undergrounds, volcanic mountains, power plants, Vehicles and so on, gases are consumed, manufactured, stored and generated. Our goal is to use our expertise and years of experience to protect precious lives and valuable assets.

Optional accessory

- Calibration Station, SDM-3R
- Powerful pump unit, RP-3R and more
